Accessibility

These checks highlight opportunities to improve the accessibility of your web app (https://developer.chrome.com/docs/lighthouse/accessibility/?utm_source=lighthouse&utm_medium=node). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing (https://web.dev/articles/how-to-review?utm_source=lighthouse&utm_medium=node) is also encouraged.

ADDITIONAL ITEMS TO MANUALLY CHECK (10) Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review (https://web.dev/articles/how-to-review?utm_source=lighthouse&utm_medium=node).

Best Practices

TRUST AND SAFETY

- Ensure CSP is effective against XSS attacks
- Ensure proper origin isolation with COOP
- Mitigate clickjacking with XFO or CSP
- Mitigate DOM-based XSS with Trusted Types

SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on Core Web Vitals (https://web.dev/explore/vitals?utm_source=lighthouse&utm_medium=node). Learn more about Google Search Essentials (https://support.google.com/webmasters/answer/35769).

CONTENT BEST PRACTICES

- Document does not have a meta description

Format your HTML in a way that enables crawlers to better understand your app's content.

ADDITIONAL ITEMS TO MANUALLY CHECK (1) Show

Run these additional validators on your site to check additional SEO best practices.
